### Quoting

To obtain a quote of your CAD File please call our friendly efficient customer service team on our Toll free number 1800 888 590. You will need to provide the maximum height, width and depth of your drawing in millimetres.

### Processing Of Incoming Files

All CAD files can be emailed to us at [preciousmetals@pwbeck.com.au](mailto:preciousmetals@pwbeck.com.au) before 1pm for fastest turnaround time. We accept STL (preferred) or SLC files for printing. Once your files are received your model will be checked for its integrity by our quality assurance team, reducing any unexpected results. If there are any foreseeable problems we will contact you before we proceed to print. Our software is designed to detect and repair small errors although we cannot guarantee a quality print or be held responsible for any errors found in STL or SLC files.

Once received and checked we will either email confirmation we have received your file or discuss any issues we may foresee.

## Additional Casting Services

### Sprue Grinding

All Raw Precious Metal Castings have a sprue or multiple sprues attached. Our Sprue Grinding Service offers the benefit of reducing metal costs as our skilled technicians can expertly grind away 95% of the excess metal on your cast items.

- Providing reduction in metal costs
- Reduction of your labour costs

### Pin Tumbling

For the jeweller who needs to achieve a shiny surface in those hard to reach places. Our casting team can use our magnetic pin tumbler to get in behind settings and galleries.

- Reduction of your labour costs
- Maximise finish

Before

After

### Sand Blasting

This service is for the jeweller who needs a sand blasted finish without the expense of owning your own unit.

### Wax Resizing Service

Our Resizing Technicians can expertly resize injected waxes (from rubber mould) before they are cast. We provide a neat resizing and can also fill in carat stamps, hollowed out sections to hide blemishes prior to casting if requested.

- Reduction in metal costs
- Reduction in labour costs
